# Design. Engineer. Certify.

## Endego & Ricardo at TRAKO 2025

At TRAKO 2025, two industry leaders - Endego and Ricardo - join forces to offer a complete, future-ready approach to rail system development. From early-stage consultancy to long-term operational support, we deliver seamless solutions across the entire lifecycle of rolling stock.

### For your benefit

Whether you're developing new rolling stock or upgrading existing systems, we ensure your project is designed to perform and built to last. We work with governments, operators, infrastructure managers, leasing companies and manufacturers to ensure railways deliver the highest possible value to their customers and wider communities.

## Meet our teams at TRAKO 2025

Let's explore how we can support your next project - from concept to compliance. **You're welcome to connect with us at our booth, Hall F, booth 116.**

# A selection of our competencies

**Mechanical and electrical design & development for rolling stock**

**Advanced systems engineering and integration**

**Virtual validation, simulation, and prototyping**

**Agile engineering teams with deep sector experience**

**Requirements management and certification & assurance**

**Regulatory compliance and safety case development**

**Strategic consultancy for operations and maintenance**

**Long-term operational support and performance optimisation**
