

# INDUSTRIALISATION CONSULTANCY

Tap into Ricardo's extensive expertise to launch new products, keep production programmes competitive and cost-effective, and solve live manufacturing problems.

**Ricardo specialises in industrialisation consultancy packages for complex technologies and niche volume production.**

We deliver manufacturing, operational and supply chain consultancy tailored to the unique requirements of our clients and their technology. Our expert guidance and practical support is enabling our clients to improve efficiency, increase cost-effectiveness, operate sustainably, and remain competitive in challenging markets and conditions.

From start-ups to established multi-nationals, we apply our proven range of tools and techniques to help customers to launch new products, improve production processes and solve complex manufacturing challenges.

Ricardo's approach is technology agnostic. We provide manufacturing knowledge, not product knowledge. This enables us to deliver an independent review of the project requirements and a flexible approach which truly reflects the requirements of our clients.

## OUR SOLUTIONS

- New Product Introduction (NPI) services
- Production planning
- Design for manufacture and assembly support
- Supply chain selection and management
- Ramp out of production support
- Product variant management
