

ENGINE ASSEMBLY FOR LEGACY PRODUCTION

TAKING THE RISK OUT OF BALANCING NICHE VOLUME LEGACY AND FUTURE PRODUCTION VOLUMES

Ricardo provides world-class support for OEMs and tiered suppliers looking to outsource assembly of engines in existing and legacy product lines.

With decades of experience **managing niche volume production**, we are well placed to support on programmes with declining or unpredictable volume demands, **providing a dependable solution** to support our clients' aftermarket supply chain.

Our engine assembly outsourcing programmes allow our clients to focus on the next generation propulsion systems, preserving precious **in-house manufacturing space** for future investment without the risk of failing to meet demand for existing models out in the market.

WHY RICARDO?

- **IATF 16949:2016 and ISO 9001 certified** assembly of powertrain assemblies, sub-assemblies and components
- **Fully flexible production lines** capable of ramping up and down to reflect variable demand
- **Supply chain management** for non-manufactured components
- **Fully traceable and repeatable processes**
- Full **PPAP and quality assured offering** at component, assembly and system level
- Management of sub-contract processes (**NADCAP approved**)
